CAREER OBJECTIVE

Aspiring professional with strong programming skills and development knowledge, eager to contribute to innovative projects, solve complex problems, and grow within a dynamic and collaborative work environment.

EDUCATION

Sri Manakula Vinayagar Engineering College

B.Tech in information Technology with **7.75** CGPA 2021 - 2025

J.Jeya Marticulation Higher Secondary School

Higher Secondary Certificate - 76.4% 2020 - 2021

Secondary School Leaving Certificate - 66.4% 2018 - 2019

TECHNICAL SKILLS

Tools & programming Language : Python, Web Development (HTML, CSS, Bootstrap, Javascript), MySQL

Soft Skills : Team Management, Adaptability, Effective Interaction, Time Management

PROJECT

Enhanced Medical Image Segmentation for Lungs Imaging based on Deep Learning

- Developed a deep learning–based system for accurate lung image segmentation in medical datasets.
 - Improved feature extraction using optimized CNN architectures for better region detection.
 - Enhanced boundary identification in lung images to support early diagnosis and clinical analysis.
 - Focused on increasing segmentation precision, robustness, and overall model performance.
 - Contributed to building a scalable and reliable solution for advanced medical image processing.
-

ACHIEVEMENTS

- Best Innovative Team in International Level Ideathon Event “AGAM 5.0”
 - Participated in “KURUKSHETRA 2023” event at Anna University
-

CERTIFICATIONS

- NPTEL: Foundation of Cloud IoT Edge ML
 - Accenture: Artificial Intelligence
 - Udemy: Python Certification
-

AREA OF INTEREST

- Cloud Computing
- Internet of Things
- Machine Learning
